

GHOST

**Bidirectional wireless
two-channels transmitter,
with magnetic contact**

AUS electronics

ITALIAN SECURITY MANUFACTURER

GHOST WS4 PLUS

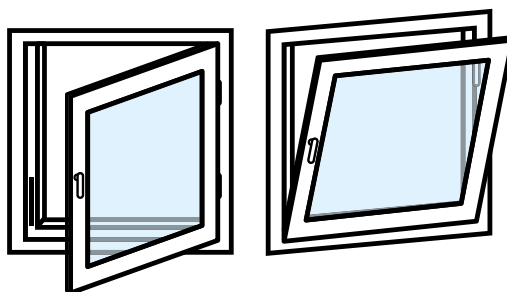

Safe, clean and invisible installation!

Ghost is a magnetic contact and it has been designed to detect the opening of doors and windows.

It's suitable for most installations, on wooden and PVC windows frame and thanks to an innovative accelerometer which detects any movement, it is protected against any tamper attempts.

The technology and the elegant design make the product extremely safe and invisible! The detector, powered by two batteries, communicates through the bidirectional GSKF protocol on the FM 868 MHz frequency.

APPLICATION: It can be installed in the windows frame.

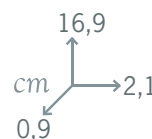

FEATURES:

- Two-channels magnetic contact
- Optional input
- Integrated accelerometer
 - Digital tamper wall removal and disorientation
 - Inertial detector
- Wireless bidirectional detector - 868 MHz GSKF
- Multi-frequency with automatic channel setting
- 2 batteries CR1632 included
- Life batteries: 2 years with low consumption
- Easy programming through the control panel, the laptop and the App MyAVSAlarm

Size 1:1
