PRESS RELEASE

Curtarolo (Pd), 19 January 2020

AVS Electronics at INTERSEC-DUBAI 2020

AVS Electronics SPA, an Italian production company of security systems, taking part of the RIELLO ELETTRONICA International Group, attends INTERSEC 2020, the prestigious event dedicated to the security market, scheduled in Dubai, from January 19th to 21st at the Hall 2 - booth C24.

AVS Electronics presents the advanced 4G technology, able to connect using all the previous technologies, to assure connection and security at the highest levels; the products presented are: the bidirectional wireless **RAPTOR 4G control panel**, the **XTREAM control panel with the modules XGSM 4G**, more and more powerful and integrated, and **STARLINK 4G**, the polyvalent telephone dialler and interface.

Another important news is the **EWEB VIDEO IP board**, that allows the connection to the Internet of AVS control panels, granting the maximum freedom of management for end user and installer. The programming via IP or Cloud, the Web Server management, and the management through the MY AVS ALARM app and the integration of the new function of VIDEO VERIFICATION are all the features and the opportunities offered by the EWEB VIDEO board. The EWEB VIDEO board is compatible with all the AVS control panels and it can manage up to 8 IP cameras, with ONVIF® (S) protocol.

The AVS range is completed with 2 other important products: **GHOST**, the new bidirectional, wireless transmitter with magnetic contact for a safe, clean and invisible installation and **WIC 4 MINI**, the new bidirectional wireless magnetic contact designed for the detection of opening of doors and windows, with a compact design and, thanks to its small size, it adapts to any application context, for indoor and outdoor (IP65).

Since 1974, AVS ELECTRONICS designs ideas, develops and manufactures electronic security products and solutions, offering a complete range of products, wire & wireless, technologically advanced, unique, reliable ang guaranteed over time, to create well-being and safety in everyday life.

AVS Electronics has a widespread international structure and attends the main trade fairs in the security market in Italy and all over the world, operating by a direct relationship with customers, to provide highly professional solutions, in line with the regulations and local needs.
