

WIC 4 Mini

**Two-ways wireless
indoor and outdoor
double magnetic contact**

WIC 4 MINI

The new bi-directional wireless magnetic contact, for doors and windows

WIC 4 MINI is a magnetic contact, designed for the detection of the opening of doors and windows, with a compact design and, thanks to its small size, it adapts to any application context, for indoor and outdoor (IP 65). It is available in two versions WIC 4 MINI and WIC 4 MINI PLUS. The particular technology of the PLUS model guarantees high safety standards as the anti-sabotage by magnet and, thanks to the accelerometer, the digital anti-tear or the inertial function with adjustable levels.

WIC 4 MINI PLUS - FEATURES AND BENEFITS:

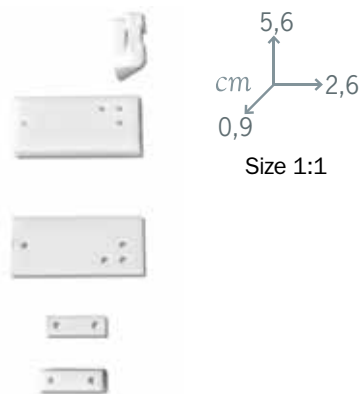

- Simplified configuration with self-learning in the control panel.
- Setting of operating parameters directly from the control panel, PC or from MY AVS APP.
- 2 separate inputs for wire, inertial or alarm switch contacts with digital pulse counter.
- Wide installation flexibility thanks to the double 90 ° reed.
- Anti-sabotage by magnet with double reed to guarantee high immunity to sabotage.
- Inertial sensor integrated with adjustable sensitivity accelerometer.
- Digital anti-tear with accelerometer for precise tamper signaling.
- Outdoor installation, thanks to the gasket integrated in the mold.
- Available colors: white, black and brown.

TECHNICAL DATA:

Power supply:	1 battery 3Vdc Lithium CR2032 (included)
Communication protocol:	FM 868 MHz Radio coverage: up to 200 meters in open field
Dimensions:	26 x 56 x 9 mm
Certification:	IMQ EN50131 Grade 2
Protection degree:	IP65

Accessories available:
Spacers and supports in three different colors
